Search 7

View results by clicking on set #3.
Step 8

To display most recent records click on ‘Year.’
Cochrane definition for **Protocol**: ‘The plan or set of steps to be followed in a study. A **Protocol** for a systematic review should describe the rationale for the review, the objectives, and the methods that will be used to locate, select, and critically appraise studies, and to collect and analyze data from the included studies.’
Definition for Cochrane Reviews:
‘Are systematic summaries of evidence of the effects of healthcare interventions. They are intended to help people make practical decisions. For a review to be called a ‘Cochrane Review’ it must be in CDSR or CMR. The specific methods used in a Review are described in the text of the review.’
Step 9
Cut and paste ‘search history.’
Save it to your PowerPoint.
Step 10

Cut and paste result citations into a Word document.
